

Clinical Trial Labeling, Packaging & Manufacturing

Mikart offers a comprehensive range of clinical supply services for solid oral dose and non-sterile liquid products. We can manufacture, package, label and distribute your clinical trial materials for later phase (III & IV), multi center, open-label and double-blind randomized studies. Our services are cGMP, GCP and GLP compliant and include established procedures in accordance with the CFRs and ICH Guidelines.

Clinical Supply Services:

- ▶ Phase III & IV Manufacturing and Packaging (cGMP Compliant Facilities)
- ▶ US and Canada, Phase III & IV Basic Design Capabilities
- ▶ Randomization Generation
- ▶ Randomized, Double Blind, Two/Three Panel Label Capabilities
- ▶ Various Masking/Blinding Methods
- ▶ Packaging Capabilities include Blisters, Bottles and Pouches
- ▶ Customized Packaging Design
- ▶ Custom Secondary Packaging & Patient Supply Kits
- ▶ Child-resistant Packaging
- ▶ Bulk Distribution
- ▶ Analytical Testing Services
- ▶ CII-CV Capabilities
- ▶ High Speed Placebo Manufacturing
- ▶ Weight Sorting

Our expertise will provide the flexibility and customization to fit your Clinical Supply needs. We offer over-encapsulation, blending capabilities and placebo manufacturing. Packaging options include bottles, blisters (thermo-formed and cold-formed) and laminated foil pouches. Through the collaboration with a third party clinical label vendor, we can provide multi panel and booklet label designs.

Customer satisfaction is our highest priority. Your Clinical Supply needs will be met in a timely and cost effective manner.
