

Manufacturing Services

Small Scale Development Manufacturing Clinical Trial Materials Commercial Manufacturing

With more than 45 years of outsourcing expertise, Mikart can take your product from formulation development through full-scale commercial production. Our capabilities include fluid bed granulating, high shear granulating, roller compacting and other advanced manufacturing technologies to ensure your product is made according to the highest quality standards.

Mikart's manufacturing and packaging facilities are designed to provide clients with a flexibility not often found with other contract service companies. We offer a wide variety of equipment choices to handle most customer's production requirements. Our knowledge and expertise in solid dose and non-sterile liquid products will help you move your product to market faster.
